0.81%	-	-	-	-	0.81%

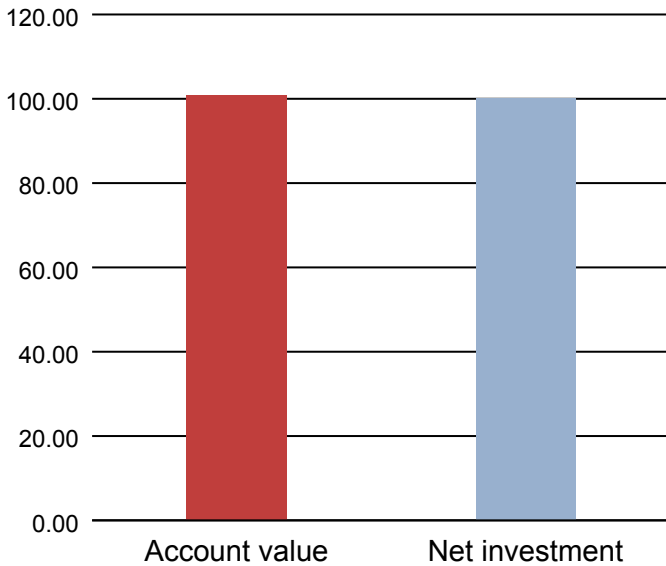

The percentages in this table are your individual rates of return, calculated using a money-weighted rate of return after fees have been deducted. The calculation considers the performance of the investment(s) in your account, including both realized and unrealized gains, and losses. It also considers any income from these investment(s), as well as any deposits or withdrawals from your account. Contact your advisor for more details about this calculation.

* The book cost is the total amount paid to purchase a security, including any transaction charges related to the purchase, adjusted for reinvested distributions and returns of capital and corporate reorganizations. The book cost is provided to help you calculate your gains and losses, but the suitability of these amounts for tax purposes is not guaranteed. For example, if you have units of an identical fund in more than one non-registered account, you need to consider all such units when you calculate the book cost of each identical fund.
